Colour: Please work in CMYK colour mode (RGB colours will be converted to CMYK before printing and will print differently to the RGB colours that you see on the computer screen). CMYK colours are what we can output. You can use Pantone® colours and we will do our best to match them when printing. Please be aware that colours will be printed as the closest CMYK equivalents.

Note: Web or low resolution graphics can cause unwanted pixelation effects when enlarged therefore we recommend that images used in the artwork be of the highest quality at least 300dpi in 1/4 sized artwork.

We endeavour to check all artwork files before printing however we cannot be held responsible for any issues arising directly from supplied artwork.
